

# FCE School

At the Masaiti Staff School we have friends from all over the world! We have Zambians, Malawians, South Africans, Angolans and even a Canadian friend who came to visit us for some time. Their parents are serving at some or other department here at Masaiti.

Together we love to do creative things because it is fun to discover so many wonderful things about God through art. Did you know you can colour a picture using a flower? Yup, you simply crush the petals of the flower unto your paper to colour it! You will be surprised to find many different shades of colours right in your garden!

## Facepaint

Here in Zambia we sometimes run out of paper and then we just paint on one another's faces! (Just joking!) We paint on one another's faces because we learn about colours and shapes and making funny faces by using paint on our friends. That's not all...we go then and make up silly songs and dances to entertain those who are willing to look and listen to us!

## Posters

Grade 3 had a look at different diseases in our region which included malaria and bilharziasis and how to prevent and cure it. We thought our own Health Post needed a little encouragement. So, we made them some colourful informative posters about these diseases with helpful tips and information to put on the walls for patients to look at in the waiting room.
